

### THE PROGRAM IN SHORT

#### THE PROGRAM

In this master, with leadership and consultancy skills, students help companies transition to a sustainable business model while maintaining financial performance.

Two students will be assigned per company.

#### TIME INVESTMENT

The consultancy consists of one school year, where students are expected to spend about 2 days a week at the company.

#### COMPANY COMMITMENT

It is crucial that a contact person from your side is available (Coaching is not required as they should be able to operate independently).

#### EXAMPLE PROJECTS

- Explore plant-based options instead of dairy in products.
- What can we do with the emission of raw materials?
- How to reduce packaging numbers in e-commerce?
- How can a company have recycling containers all around the world?

#### WHO ARE OUR (INTERNATIONAL) STUDENTS?

Students with different backgrounds i.e. engineering, business, etc, who understand the transition to a sustainable business model.

They will be under the guidance of our lecturers, but require a point of contact at your company.

### WHAT'S IN IT FOR YOU - APPLIED RESEARCH

- Strong motivated students with a fresh point of view on circular economy.
- Students will work as a junior consultant.
- Mix of national and international students.
- Latest research of circularity, ecosystems in the companies.
- Work on practical solutions (smaller solutions)
- Focus on leadership so students can implement this.
- No costs involved.
